About this Report

This report is based upon Swift Analysis Aptitude, an online test of the ability to reason with information presented in verbal, numerical and diagrammatic formats.

The results are compared against a group of 3,464 professionals and managers who have completed the test. The results in this report are presented on a 1 to 10 Sten scale, where 1 indicates low performance and 10 indicates high performance on the test. The margin of error that should be allowed before concluding that there is a difference between scores is indicated by the diamond shape.

When reading this report, please remember that it is based on the information gained from the test completion only. It describes performance on this particular test, rather than performance at work or study. Research suggests that ability tests can be powerful predictors of successful performance in study and work activities.

The information contained in this report is confidential and every effort should be made to ensure that it is stored in a secure place.

The information contained within this report is likely to provide a valid measure of aptitude for 12 to 24 months.

The report is based on the results of the online test that the respondent was invited to complete under unsupervised conditions. The identity of the actual respondent has not been verified by a test administrator. Further testing under supervised conditions is recommended for high-stake decision making.

This report was produced using Saville Assessment software systems and has been generated electronically. Saville Assessment do not guarantee that it has not been changed or edited. We can accept no liability for the consequences of the use of this report.

The application of this test is limited to Saville Assessment employees, agents of Saville Assessment and clients authorised by Saville Assessment.

Introduction to Assessment Report

This report provides feedback on the responses of Paul Sample to the Swift Analysis Aptitude test.

Total Score

This test measures verbal, numerical and diagrammatic analysis, which are important in the world of work for a variety of roles. This section of the report provides a total test score relative to the comparison group: Professionals and Managers (IA; 2009)

The Total Score indicates how well Paul Sample has performed overall on the test.

Aptitude Area Sub-Scores

The sub-scores provide information on how Paul Sample performed on each of the aptitude sub-tests. The pattern of results indicates relative strengths and weaknesses across the following areas of aptitude:

Verbal - assesses the ability to understand, interpret and evaluate written information.

Numerical - assesses the ability to understand, interpret and evaluate numerical data.

Diagrammatic - assesses the ability to analyse diagrams, sequences and transformations.

Aptitude & Pace Comparison

Aptitude and pace scores are shown for each of the areas in the test. These scores are compared in a graph using a 1 to 10 sten scale, with the sten values given in brackets. The pace score is based on the candidate's response time for the questions they completed compared to the average response time for the same questions. Pace is shown from slow at the bottom of the graph to fast at the top. Aptitude runs from low on the left of the graph to high on the right.

Total Score

This page shows the Total Score relative to the Professionals and Managers (IA; 2009) comparison group on a 1 to 10 sten scale.

Interpretation Guidelines

Comparison Group: Professionals and Managers (IA; 2009)

- Sten 1: higher than about 1% of the comparison group
- Sten 2: higher than about 5% of the comparison group
- Sten 3: higher than about 10% of the comparison group
- Sten 4: higher than about 25% of the comparison group
- Sten 5: higher than about 40% of the comparison group
- Sten 6: higher than about 60% of the comparison group
- Sten 7: higher than about 75% of the comparison group
- Sten 8: higher than about 90% of the comparison group
- Sten 9: higher than about 95% of the comparison group
- Sten 10: higher than about 99% of the comparison group

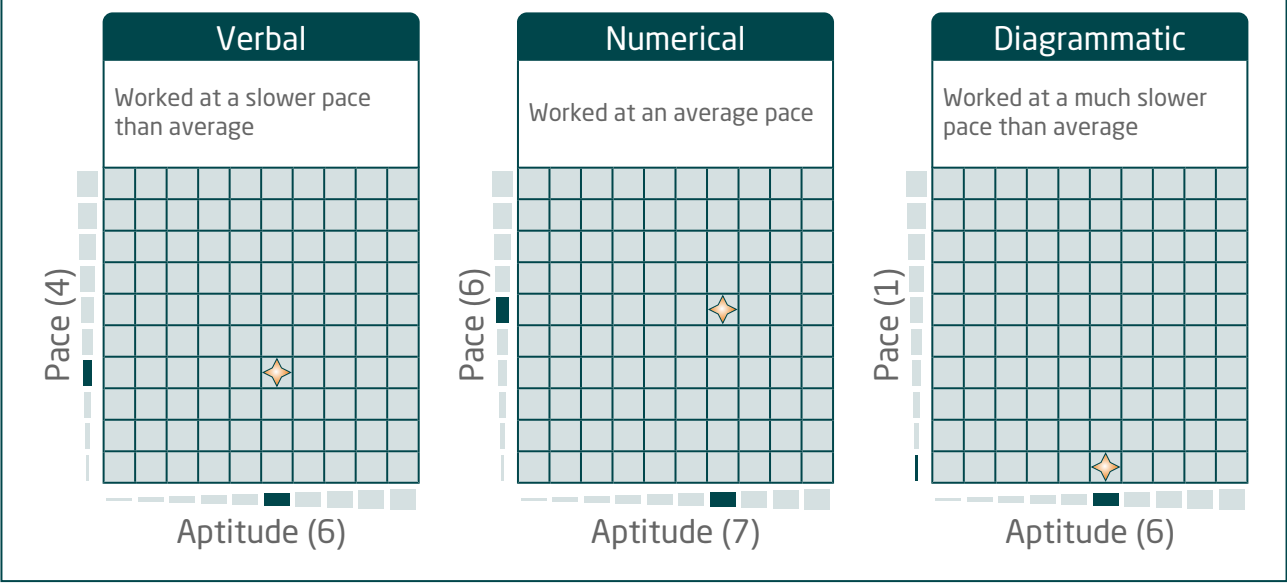

Aptitude & Pace Information

This page displays aptitude and pace information for each of the areas in the test.

Aptitude Area Sub-Scores

Scores	1	2	3	4	5	6	7	8	9	10
Aptitude Areas	Verbal (Average - 66%ile) Likely to find working with verbal information as easy as other people.									
Numerical (Above Average - 69%ile) Likely to find working with numerical information easier than other people.										
Diagrammatic (Average - 66%ile) Likely to find working with diagrammatic information as easy as other people.										

Aptitude & Pace Comparison

Improving Abilities

Some tips for improving abilities are provided below:

Verbal

- When you read newspapers and articles, try to establish the main points.
- Look up the meaning of unfamiliar words.
- Read passages of text and pick out the key details.
- Compare written arguments, looking for similarities and differences between them.
- Look at something you have written and rewrite it more concisely.

Numerical

- When you read newspapers and reports, pay attention to numerical information.
- Complete calculations both with and without a calculator.
- Look for differences such as percentage changes in numerical trends.
- Check calculations done by others.
- Take on responsibilities which involve working with numbers.

Diagrammatic

- Examine diagrams in books and newspapers.
- Study flowcharts of processes and procedures.
- Improve your logic by solving puzzles.
- Try to clarify different types of relationships within diagrams.
- Create diagrams in order to illustrate sequences of events.

Online Test Access Summary (For Assessor Use)
